Integrating the surrogate over the muon flow: sampling vs. the grid (reference: grid 1601x64:4)
expected hits Y
gradient at u = 0
Hessian at u = 0
relative error vs. the reference grid
points (muons) per estimate
points (muons) per estimate
points (muons) per estimate
Monte Carlo
grid, one position per node
grid, 1 position per node (rms over seeds)
grid, 4 positions per node (rms over seeds)
